BRAND LAO - FOR BETTER LIVELIHOODS
Project ID: 00101680

Project Description
Economic growth in Lao PDR has been strong for several years in a row. This impressive result has been primarily driven by the non-agricultural sector through export of natural resources, either minerals extracted or energy produced via hydro power. However, it has not resulted in much employment and livelihood creation. The agricultural sector still employs approximately 70 per cent of the population, but it is a sector characterized by low productivity and high vulnerability. As a result, it has been difficult to lift people out of poverty and reduce the gap between rich and poor.

This project aims at identifying potential profitable Lao products to be exported to the international market. The ultimate objective will be to substantially raise income for producers, farmers and service providers involved at every stage of the value chains operated by those who join the scheme, benefiting directly from the export.

Special techniques will be adopted to identify ‘competitive advantages’ of Lao PDR from the point of view of the international consumers, particularly the ‘ethical consumer’ – a large group of international clients who pay higher prices in return for various assurances and product benefits, including ethical guarantees and natural/organic products. Although it will build on previous studies, this project will invoke a new analysis and innovative approach to poverty reduction in Lao PDR.

Several products (possibilities could include tea, rice, coffee, spices, pepper, fruit, wooden furniture, silk and clothing - among others) and tourism, particularly eco-tourism, are being considered and will be assessed further for how to develop their international appeal to the fullest extent. Producers and enterprises will market these products to international consumers with higher profit margins with the help of high-quality product development, branding and a specialised sales structure. These products will be marketed under the ‘Lao Brand’, a presentation featuring and reinforcing the uniqueness of Lao culture with a credible, sustainable and ethical appeal to consumers in Asia, Europe and elsewhere in advanced economies. The ‘Lao brand’ will guarantee fair income and treatment to local communities, including the producers.

October 2017
**Main Objectives and Outcomes**

The target objective is the creation of a launching pad for the “Lao Brand”, bringing inclusive prosperity and development through premium sales. To achieve this, the project will be implemented by and in a close collaboration with the Lao National Chamber of Commerce & Industry (LNCCI). This project will build a sustainable foundation upon which larger scale interventions can support the priorities identified in the Government of Lao PDR – UNDP Country Programme Document, as well as help with successful implementation of the 8th National Socio-Economic Development Plan (NSEDP) 2016-2020, the aspiration to graduate from the status of a Least Developed Country (LDC) and eventually ensure progress on the Sustainable Development Goals (SDGs).

The expected outcomes are:

- Produce a long-list and an evidence-based prioritized shortlist of eligible products
- Analyse, study and select the most appropriate market trends in foreign markets, consumer groups, and the most effective brand messages for those groups
- Establish the Lao Brand Promotion Facility at the LNCCI: a permanent, highly professional marketing management resource for the private sector.
- Establish the structure of export marketing groups in several of the selected sectors, identify appropriate suitable enterprises as members and help them create their plans, quality and responsibility charters, and devise roadmaps for export.

The long-term impact of the project is for Lao PDR to achieve the Agenda 2030 and LDC graduation by increasing economic opportunities, lifting people out of poverty.

**Partnerships**

The LNCCI and UNDP will be key partners in this project, through giving Lao business, particularly SMEs and startups, the structures and expertise to participate in international trade, and profitable brands for direct sales. Such development is to be the central theme at the LNCCI, which bridges the private sector and the public sector.

Importantly, it will involve consultation and advocacy with line ministries such as Agriculture, Tourism, Environment, Science and Technology. UNDP will maintain the dialogue on practical ways in which rapid and socially responsible growth can come from the private sector.

**Funding:**

- Total project budget: USD 490,000
- UNDP (Regional Pipeline Development Fund): USD 200,000
- Unfunded: USD 290,000
